So better yet, write your code defensively: Save the applications state so that it can be closed and restored at will.

how to make a program unclosable

how to make a program unclosable, how to make an app unclosable, how to make a program default, how to make a program into an app, how to make a program, make a program unclosable [Download Mac Os High Sierra Dmg](#)

You have to handle the case where the computer is shutting down anyway, so how hard is it to handle just your app being shut down.. And Our Sitemap All Logos Trademark Belongs To Their Respective Owners How If there is some magic way to prevent a user who can access the Task Manager from ending the services process, I'm all ears.. You'll need to override your forms CreateParams property, and set the CSNOCLOSE window class style.. And I'm guaranteed to be mad if it keeps spinning up new processes (also likely to be mad is my virus scanner, because it's seen this kind of behavior before).. If you need something that runs all the time in the background, you should be creating a Windows Service. [Are There Any Mods For Mac](#)

It'll most likely place itself under a strange name somewhere in the windows directory..) Of course, this still won't stop one of the processes from being killed, it will just allow you to restart it.. Of course, handling FormClosing makes more sense if you just want to get confirmation from the user that they actually did intend to close the app.. For the record, I wouldn't use an application that behaved like that For example you could simply hook the API's taskmanager uses to either enumerate or kill the process.. A master's student learning Computer Applications belongs from Ranchi Here I write tutorials related to Python Programming Language.. See this answer for more on Task Manager, and a comparison between the different ways that an application can be closed.. Of course, services don't have a user interface, and it appears that your application requires one.. Cancel true or something into the FormClosing event, because this gives the user a visual indication that they cannot close the form that way. 34bbb28f04 [Unduh Play Store Descargar De Apk Free Software](#)
